UPort

SECURITY, BUILT FOR THE BIG SCREEN.

Identity system, TV store exports, GitHub assets

Google TV / Android TV / Fire TV / tvOS references

VERSION 1.1

01 / BRAND IDEA

A portal. A lens. A presence.

UPort is a purpose-built mark for TV-based security monitoring and building access.

Two architectural pillars form the U.

A single optical ring suggests camera vision.

The lower threshold anchors the portal shape.

INDEPENDENT IDENTITY

02 / LOGO FAMILY

One identity. Four use cases.

Primary on blue

Dark app tile

Light app tile

White symbol

Use the horizontal lockup on repository artwork, website mastheads and long-form marketing.

03 / COLOR AND TONE

Crisp. Quiet. Connected.

SIGNAL BLUE
#0860FA

MIDNIGHT
#071427

NIGHT SURFACE
#0A1D3B

ICE
#EAF3FF

SKY
#68C7FF

Primary pairing: Signal Blue + Midnight + White.
Blue carries actions and status; avoid using it for every background.

04 / TYPOGRAPHY

Readable from ten feet away.

UPort

LOGO TYPE / ORIGINAL TRACED OUTLINES

Live view

Access control

Motion detected

Secondary labels and device metadata

Logo: outlined custom master. UI: Inter or Lato. Maintain strong contrast.

On TV, avoid thin weights and small interface text.

05 / STOREFRONT SYSTEM

TV-first, no stretched artwork.

GOOGLE PLAY / TV STORE LISTING

1280 x 720 | 16:9 | RGB PNG

AMAZON FIRE TV / APP ICON

1280 x 720 | 16:9 | opaque PNG

Fire TV centers its subject inside a 882 x 448 content-safe area.

06 / DIMENSIONS

Required files by platform.

DESTINATION	ASSET	PIXELS	RATIO
Google Play	App icon	512 x 512	1:1
Google Play	Feature graphic	1024 x 500	2.048:1
Google Play TV	Store banner	1280 x 720	16:9
Android TV	Launcher banner (xhdpi)	320 x 180	16:9
Amazon Fire TV	App icon	1280 x 720	16:9
Amazon Fire TV	Background image	1920 x 1080	16:9
GitHub	Social preview	1280 x 640	2:1

Store screenshots need genuine app captures. Guides in the ZIP are intentionally not submission assets.

07 / GITHUB

One coherent open-source presence.

Social preview | 1280 x 640

README header | 1600 x 500

GitHub Settings > General > Social preview: upload the dedicated social image.

Move the README hero into .github/assets/ and adjust the relative image path.

08 / MESSAGING

Designed around the real product.

SECURITY, BUILT FOR THE BIG SCREEN.

- Live camera monitoring
- Door access and building controls
- Event-based TV overlays
- Multi-TV deployments

Use factual feature claims that match the actual released version.

Do not imply affiliation, certification, or official support by Ubiquiti.

09 / MOTION AND SPATIAL RULES

Never crowd the screen edge.

882 x 448

AMAZON FIRE TV ICON CENTER SAFE AREA

Keep the icon and name inside the central area.
Do not add rounded corners or a decorative outer border.

Preview safe zone only. Final exported banner contains no guide marks.

10 / APPLE TVOS

Reference artwork, not an Xcode stack.

App Store icon reference

1280 x 768 / 5:3

400 x 240 launcher reference

1920 x 1080 store screenshots

tvOS icons require layered image stacks.
Use the flat PNGs for layout reference,
not as ready-made App Store submissions.

Google TV / Fire TV files are packaged separately from these optional Apple TV references.

11 / PRODUCTION AND LEGAL

Pre-launch checklist.

01	Replace all screenshot guides with real captures
02	Verify names, descriptions and compatibility claims
03	Upload separate storefront and launcher assets
04	Check icon masks, TV text readability and badge safe areas
05	Test UPort branding on actual Google TV / Fire TV hardware
06	Run a trademark search and obtain clearance for UPort

Note: UPORT is also a registered mark for another company in related technology categories.

12 / SOURCE DOCUMENTATION

Platform documentation / October 2026.
